DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the carrier, the slide and the 'first surface of the block' must be clearly shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being unclear for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1, lines 9-10, it is unclear what element(s) actually accesses the 'plurality of processing stations'.

Claim 4 recites the 'fixed front bearing mount receiving said second end of said shaft' and the 'block receiving said threaded shaft'. The structural inter-relationships between the above —cited elements are unclear. For example, it is not clear whether or not the block receives the first end of the shaft, or the entire shaft. It is also unclear how the bearing mount is related to the block, or the 'treaded member' — to the rest of the elements.

Regarding claim 5, the structural inter-relationships between the wear strips and the rest of the elements are not clearly set forth.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Page 4 Application/Control Number: 10/695,550

Art Unit: 1743

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

Claims 1-4 are rejected under 35 U.S.C. 102(b) as anticipated by 5. Karl et al. (US 5891396).

Karl et al. disclose a transport system for automatic analyzer. Figure 6 shows a transport sub-system comprising 'boat 22" ['carrier' - Ex.] accommodating cards with bar codes ['position tracking features' - Ex.]; collar 40A ['block' - Ex.]; shaft 42; raised ridges 37 and a raised rim 39 ['guides' - Ex.]; motor 48; L-shaped "bearing mount' (not indexed) accommodating motor 54; the 'mount' having an opening ['threaded member', not indexed - Ex.] for engaging the shaft and paddle 38 ['slide' - Ex.]. Figure 26 show bar code reader 88 ['sensor' - Ex.].

Claim Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all 6. obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- The factual inquiries set forth in Graham v. John Deere Co., 383 U.S. 1, 148 7. USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - Determining the scope and contents of the prior art. 1.
 - Ascertaining the differences between the prior art and the claims at issue. 2.
 - Resolving the level of ordinary skill in the pertinent art.

Application/Control Number: 10/695,550

Art Unit: 1743

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

8. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Karl et al.

Although Karl does not teach 'wear strips', friction protective elements / layers / coating are commonly used in the art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have employed such elements in the modified apparatus of Karl, in order to reduce the wear of working surfaces

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Natalia Levkovich whose telephone number is 571-272-2462. The examiner can normally be reached on Mon-Fri, 8 a.m.-4p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
